Art Unit: 1764

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-29, drawn to an evaporator-and-condenser unit, classified in class 202, subclass 172.
- II. Claims 30-37, drawn to a method for generating vapor from a liquid, classified in class 203, subclass 26.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practised by another materially different apparatus such as : ( For Examples Only), single effect system; short-path distillers; self or forced circulation distillers; and downflow or falling-film evaporators and therefore the apparatus is not limited to the apparatus provided with compression as embodied in the group I invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 1764

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
